

FileMaker Documentation Exhibition
(using FileMaker Go 15, iDevices and iBeacons)

Possible Use Cases

- Museums
- Exhibits
- Conferences
- Retail
- Inventory
- Hearing impaired
- Silent auction
- ...and more!

① Prepare by obtaining FMG Custom App through one of these options:

- iTunes App Store
- Mobile Device Management (MDM)
- rent iDevice

⑧ Museum follows up on opt-in requests:

- * info about specific items
- * general interest

15
fx RangeBeacons (UUID { ; timeout ; major ; minor })

Parameters:
UUID - universally unique identifier for iBeacon(s)
timeout - the # of seconds to wait before returning a value.
 If not specified, the default timeout is 5 seconds.
major - identifying a group of iBeacons. (in this case an exhibit wing)
minor - Together with the major value, identifies specific iBeacon(s)

Returns: ¶-separated list for each iBeacon found

Each row contains the following:

- UUID**
- major**
- minor**
- proximity** - relative proximity to an iBeacon.
 - 0 (Unknown) could not be determined.
 - 1 (Immediate) very close
 - 2 (Near) relatively close
 - 3 (Far) far from the iOS device.
- accuracy** - the accuracy of the proximity value, measured in meters. Helps differentiate between iBeacons with the same proximity value. A negative value means the accuracy could not be determined.
- rsi** - the received signal strength of the iBeacons, measured in decibels.
